SERVICE TIPS:

KEEP WINDSHIELD CLEAN

- Use Rain-X® Glass Cleaner frequently to remove dirt and debris
- Hardened particles and bug residue can generally be removed using a nylon mesh sponge

TIP: New wiper blades work best when installed on a clean windshield

ROUTINELY CHECK BLADE CONNECTION

Improper installation can be a common cause of streaking or chattering

TIP: Remember to remove the plastic cover from Rain-X® wiper blades prior to use

CHANGE BLADES ON GROUNDHOG DAY

Exposure to the elements can wear down and/or harden rubber on wiper blades

TIP: For maximum safety and clear vision when driving, blades should be changed every six months, or once a year on Groundhog Day

Change Your Blades **TODAY** If They Are...

When inspecting wiper blades, look for the following:

- Breaks or detachment of frame arms at joints or connection points
- Metal corrosion, especially at joints and claws
- Visible cracks, tears, and missing pieces in the rubber squeegee's edge
- Flex rubber squeegee back and forth to see if it is still flexible. Aged squeegees will have difficulty conforming to the shape of your windshield and create streaks
- Check squeegee wiping edge for rounded edges which can prevent the wiper blade from making strong contact with the windshield and reduces wipe quality
- Tug to ensure wiper blade has been securely installed on the wiper arm
- Check that squeegee is secure in the wiper frame

Remember to check your wiper blades as part of your regular preventative maintenance program!
